

CONTENTS

	Pág.
KEYNOTE LECTURES	
Multicomponent Diffusion in Clays..... <i>CAJ Appelo</i>	3
Integrating Science and Policy for Management of Groundwater at European Level. An Example: the Bridge Project..... <i>A Blum, AM Fouillac and D Müller</i>	15
Modern Concepts and Integrative Approaches in Ecotoxicology..... <i>RIL Eggen and JI Muncke</i>	25
Reactive Transport in the Unsaturated and Saturated Soil Zone: Modelling Mass Transfer Across the Capillary Fringe..... <i>P Grathwohl, U Maier, C Beyer and B Susset</i>	31
Spatial Variability of Biodegradation of Organic Contaminants in Sandy Aquifers..... <i>D Hunkeler, Y Abe, R Aravena, BL Parker, JA Cherry and M Broholm</i>	49
Lab and Field Scale Investigations of Natural and Enhanced Biodegradation Processes..... <i>M Majone, F Aulenta, S Rossetti and V Tandoi</i>	59

ALTERNATIVE METHODS AND INDICATORS OF WATER QUALITY IN NATURAL POROUS MEDIA

Assessment of Sorption Characteristics for Enhancement of Remediation of Pamukkale Travertines, Turkey..... <i>S, Açıkel and M Ekmekçi</i>	85
Space-Time Design of Piezometrics Groundwater Monitoring Networks..... <i>J Briseño and G Herrera</i>	91
Trace Elements in Groundwater of La Aldea Aquifer (Gran Canaria, Canary Islands)..... <i>MC Cabrera, JL Fernández-Turiel, F Muñoz, T Cruz and D Gimeno</i>	99
Application to CKS_0200_GWL_1 and Compliance Testing of the Methodology Developed in Bridge for the Determination of Threshold Values and Natural Background Levels for Groundwater Bodies <i>M Coetsiers and K Walraevens</i>	107
Prediction of Pesticide Occurrence in Domestic Wells Using Chemical Indicators..... <i>C Doukouré, O Banton and P Lafrance</i>	115
Use of PCAH as a Molecular Marker for Estimating the Diversity of the Protocatechuate-Degrading Bacterial Community in Soil Environment..... <i>N El-Azhari, S Chabaud, A Percept, D Bru and F Martin-Laurent</i>	121
Proposed Method to Assess the Intrinsic Groundwater Vulnerability of Shallow Aquifers: An Example from Amyntaion Basin, North Greece..... <i>C Gianneli, K Voudouris, A Stamos and G Soulios</i>	129

Triazoles – Adsorption Characteristics to Fe ⁰ and Strategies for Remediation of Contaminated Groundwater.....	137
<i>Y Jia, P Aagaard and G Breedveld</i>	
Vadose Zone Characterization in an Experimental Plot under Intensive Agriculture: Preliminary Results.....	143
<i>J Jiménez, G García, I Queralt, R Aragón, JL García-Aróstegui, F Solano and L Candela</i>	
Derivation of Natural Background Levels and Threshold Values for Groundwater Bodies in the Upper Rhine Valley (France, Switzerland and Germany).....	149
<i>R Kunkel, G Berthold, A Blum, P Elsass, JG Fritsche, R Wolter and F Wendland</i>	
Selecting Samples in Treatability Tests for Metallic Stabilization.....	157
<i>I Labastida-Núñez, A Flores-Moreno and R Briones-Gallardo</i>	
Groundwater Vulnerability Mapping Using Gis-Based Sintacs Model.....	165
<i>N Mali and M Janža</i>	
Methodological Framework for the Management and Monitoring of a Natural Denitrification Process: Case of a Chalk Aquifer in the North of France.....	173
<i>JL Martin-Bordes, E Henry and C Boulemia</i>	
Introducing Time Variability in the Mapping of Groundwater Contamination by Means of the Bayesian Maximum Entropy (BME) Method.....	181
<i>S Mattern, M Vanclooster and P Bogaert</i>	
Assessing the Risk of Arsenic Contamination of the Coastal Quaternary Aquifers in Namdinh Area (Vietnam). A Case Study Based on Indicator Kriging.....	187
<i>HD Nghia, MTh Schafmeister and B Hoc</i>	
Irrigation-Management with Respect to Sustainable Water Use.....	195
<i>R Nolz and P Cepuder</i>	
Multi-Isotopic Methods Applied to Monitoring Groundwater Nitrate Attenuation in a Regional System: Osona (NE Spain).....	203
<i>N Otero, A Menció, C Torrentó, A Soler and J Mas-Pla</i>	
Site Characterization of a Fractured Bedrock Aquifer Contaminated with Dense Non Aqueous Phase Liquids in Catalonia (Spain).....	211
<i>J Palau, M Marchesi, A Soler, R Aravena, P Queralt and A Marcuello</i>	
Assessment of Natural Attenuation of Volatile Organic Compounds in Groundwater Using Environmental Isotopes: A Case Study in Catalonia (Spain).....	219
<i>J Palau, M Marchesi, A Soler, A Canals and R Aravena</i>	
Screening of Semivolatile Organic Pollutants in Jerez de La Frontera Aquifers and Guadalete River (Cádiz, SW Spain).....	227
<i>E Pérez, VM León, C Corada, L Candela, A Gómez-Parra and E González-Mazo</i>	
Biotechnological Approaches for Risk Assessment of Contaminated Sites. From Reporter Genes to DNA-Microarrays.....	231
<i>E Puglisi</i>	
Determination of the Sources of Nitrate Pollution and Evaluation of Natural Attenuation Processes Using Multi-Isotopic Methods in the Baix Empordà Basin (NE Spain)	239
<i>R Puig, A Soler and J Mas-Pla</i>	
The Use of a Modified Mechanistic Model to Interpret Nitrogen Soil Surface Balances of Farms: Methodology and Preliminary Results.....	247
<i>X Sauvenier and R Lambert</i>	
Chemical Speciation and Bioavailability of Mercury in Contaminated Soils from Val Basento (Italy)	255
<i>S Spalla, I Cattani, GM Beone, M Trevisan, AAM Del Re and R Boccelli</i>	
Geophysical Characterisation of the Vadose Zone for Assessing Aquifer Pollution Vulnerability.....	263
<i>C Tapias, M Himi, Y Díaz, D Puigserver, JM Carmona, L Rivero, M Viladevall, M Salgot and A Casas</i>	

Vulnerability Maps and Indicator Development.....	271
<i>M Trevisan and C Vischetti</i>	
Development of a Pesticide Risk Indicator for the Evaluation of the Belgian Reduction Plan.....	279
<i>S Vergucht and W Steurbaut</i>	
Water Reuse and Microbial Contamination of Aquifers: Joining the Gap between Laboratory and Field Data.....	287
<i>N Vigués, O Sánchez, R Rodríguez, L Candela and J Mas</i>	
The EU Water Framework Directive Implementation for the Ground Waters in Bulgaria.....	293
<i>V Vladimirov and R Gorova</i>	
Strategies and Effectiveness of Groundwater Monitoring Systems for Different Aims (Report from Working Group 1).....	301
<i>HJ Voigt, C Nitsche, J Tamás, T Bíró, HP Broers and R Kozel</i>	
Improving Pedotransfer Functions by Adding Structure-Related Parameters.....	307
<i>M Weynants, H Vereecken, M Vanclooster and M Javaux</i>	
Risk Assessment of Contaminants in Groundwater.....	315
<i>PX Zhang, P Aagaard and L Gottschalk</i>	
Alternative Methods and Indicators: A Promising Combination.....	321
<i>J Zobrist and BI Escher</i>	

BIOGEOCHEMICAL PROCESSES FROM SOIL TO GROUNDWATER

Analysis of Hydrodynamic Characteristics of a Horizontal Subsurface Flow Constructed Wetland.....	329
<i>A Albuquerque and R Bandeiras</i>	
Identification and Localization of Redox Processes in an Aromatic Hydrocarbon Plume via High-Resolution Sampling of Biotic and Abiotic Gradients.....	339
<i>B Anneser, L Richters and C Griebler</i>	
Approach to Assessments of Pollutants Inactivation in a Soil System.....	347
<i>G Barančíková and J Makovníková</i>	
Lysimeters in Research and Education.....	355
<i>S Berger and P Cepuder</i>	
Water and Pesticide Transport Dynamic in a Grass Buffer Strip.....	361
<i>A Boivin, C Margoum, C Guillemain, N Ball, N Carluet, JJ Gril and V Gouy</i>	
Reactive Transport Experiments of Linear Alkylbenzene Sulfonate in Laboratory Soil Columns.....	369
<i>N Boluda, V Cases, VM León, V Gomis and D Prats</i>	
Italian Zeolitic Tuffs for Chlorinated Phenols Removal from Contaminated Groundwater.....	377
<i>MR Boni, G De Casa and S Sbaiffoni</i>	
Glyphosate Sorption and Transport in Soils of the Maresme Area (Barcelona, Spain): Laboratory and Field Studies.....	385
<i>L Candela, MT Condesso de Melo, J Caballero and PSC Rao</i>	
Clay-Based Formulations of Simazine to Reduce Herbicide Leaching in Sport Turfgrasses.....	391
<i>L Cornejo, R Celis, C Domínguez and J Cornejo</i>	
Kinetic Studies of Nitrate Microbiological Reduction for an In Situ Heterotrophic Denitrification Test of a Polluted Aquifer.....	397
<i>C Domènech, S Jordana, L Duro, F Grandia, J Guimerà, G Coscera, D Arcos, J Bruno, M Rovira, V Martí, M Calderer, C González and J De Pablo</i>	

Hydrogeological Conditions and Biogeochemical Processes Governing Metal Transport in Groundwater Systems.....	403
<i>F Einsiedl, T Schäfer and M Wolf</i>	
Spatial Variability of Isoproturon Mineralizing Activity Within an Agricultural Field: Geostatistical Analysis of Simple Physicochemical and Microbiological Soil Parameters.....	411
<i>T El-Sebai, B Lagacherie, G Soulas and F Martin-Laurent</i>	
Characterization of Nanoscale Iron for Groundwater Remediation.....	419
<i>F Freyria, R Sethi and A Di Molfetta</i>	
Effects of Acoustics on Soil Desorption Capacities: Laboratory Studies.....	427
<i>AK Hindu and J Takemura</i>	
Stable Isotopes as a Tool for Monitoring the Volatilization of Non-Aqueous Phase Liquids from the Unsaturated Zone.....	435
<i>P Höhener, D Bouchard and D Hunkeler</i>	
Biodegradation of Polycyclic Aromatic Hydrocarbons and Petroleum Products by <i>Acinetobacter Mallei</i>	443
<i>MN Igwo-Ezikpe, GO Gbenle and MO Ilori</i>	
Risk Induced of Lead Mobility in Soil Percolation Waters by the Use of Chelates in Assisted Phytoremediation: Columns Experiments.....	449
<i>G Mancini, A Taibi, P Falciglia and FGA Vagliasindi</i>	
Development of Chemical Indicators to Study In Situ Biotenitrification Processes in Contaminated Groundwater.....	457
<i>V Martí, M Calderer, M Rovira, F Seco, J De Pablo, JL Cortina, S Jordana, L Duro, J Guimerà and J Bruno</i>	
Arsenite and Arsenate Adsorption and Mobility in Soil-Water Environments.....	463
<i>M Martin, E Barberis, A Violante, G Yu, L Kozak and PM Huang</i>	
An Assessment of the Experimental Error of a Non-Invasive Optical Technique in Transparent Porous Media.....	469
<i>M Massabo, F Catania, O Paladino and G Bracco</i>	
The Effect of Background Electrolyte Chemistry on Uranium Fixation on Scrap Metallic Iron in the Presence of Arsenic.....	477
<i>C Mbudi, P Behra and B Merkel</i>	
Experimental Design of N-Pig Slurry Leaching Columns: Measurement of Inorganic Nitrogen Losses.....	485
<i>M Montoya and M Martín</i>	
Transport and Fate of Pesticides in the Fucino Plain (Italy) through Soil to Groundwater: An Analysis by IPTM-CS Simulation Model.....	493
<i>E Pacioni and M Petitta</i>	
The Role of Mineralogical and Organic Fraction on Metal Adsorption onto Soil: Experimental Approach and Modelling.....	501
<i>M Petrangeli-Papini, P Liburdi and V Giuliano</i>	
MODALL: A New Module for Design and Optimization of Plume Capture Schemes.....	509
<i>S Potter, E Moreno-Barbero and C Divine</i>	
Management of Water and Land Resources Pollution in Central Asia: Transboundary Aspects.....	515
<i>Y Rysbekov</i>	
Contamination by Agricultural-Origin Nitrogen Compounds within a Porous Multilayer Aquifer in Southern Spain.....	523
<i>D Sánchez, I Vadillo, F Carrasco and E Mancera</i>	
Combining the Spatial and the Temporal Scale: A Link to an Understanding of Denitrification.....	531
<i>M Schwientek, P Maloszewski, W Stichler and F Einsiedl</i>	

The Enhanced Cadmium Removal from Aqueous Solutions by Starch Derivatives.....	537
<i>S Semsari, F Mokrane, FZ Halaimi, H Boutoumi and AH Saddok</i>	
Time and Space Scale Dependent Macroscopic Balance Equations Governing Flow and Transport in Aquifers.....	541
<i>S Sorek and D Ronen</i>	
Distribution of Nitrogen Species and Evidence of Denitrification in the Velez River Aquifer (South of Spain).....	549
<i>I Vadillo, J Benavente, K El-Mabrouki, F Carrasco, V López and JL García-Aróstegui</i>	
Nitrate Leaching Investigation Using Experimental Plots in Sa Pobla, Mallorca (Spain).....	557
<i>KJ Wallis, RM Mateos, L Candela and P Cepuder</i>	
Diffusion of Contaminants in a Clay Formation: Results from Large Scale Migration Tests at the Mont Terri URL.....	565
<i>P Wersin, JM Soler and LR Van Loon</i>	

NUMERICAL SIMULATION OF POLLUTANT TRANSPORT AND INTERACTION IN SOIL AND SUBSOIL TECHNIQUES, PROBLEMS AND CASE STUDY

Identification of PCE Plume Source through the Application of the Integral Pumping Test Method in the City of Fabriano.....	573
<i>L Alberti, S Lombi and A Zanini</i>	
Development and Application of a 2D Reactive Transport Model Aimed at Evaluating the Effectiveness of RD Stimulation by Lactate Injection at a CAHs Contaminated Site.....	581
<i>F Aulenta, F Bozzano, M Leccese, M Petitta, M Petrangeli-Papini, P Viotti</i>	
Optimization of Land Use for Sustainable Groundwater Quality.....	589
<i>P Cepuder, R Nolz and V Aus der Schmitzen</i>	
Experimentation and Numerical Simulation of the Transport of Nitric Nitrogen in a Sandy Soil.....	597
<i>M El-Haroui, A Maslouhi and M Ibnoussina</i>	
Assessing the Impact on Groundwater of Solute Transport in Contaminated Soils Using Numerical and Analytical Models.....	603
<i>A El-Sadek</i>	
Monitoring Nitrates in Shallow Groundwater in the Po Valley.....	611
<i>G Fait, F Ferrari, T Ferrari, E Capri and M Trevisan</i>	
Quantification of Biodegradation and Volatilization Rates of Organic Compounds in Soils by Using the Dusty Gas Model.....	619
<i>C Fen</i>	
Multiobjective Optimization for River Basin Management Plan.....	627
<i>L Galbiati, FJ Elorza, A Udias and F Bouraoui</i>	
Reactive Transport Modelling of Denitrification Plumes Induced by Organic Matter Injection.....	635
<i>F Grandia, C Domènech, S Jordana, G Coscera, D Arcos, L Duro, J Guimerà and J Bruno</i>	
Field Scale Reactive Transport Modelling: Temperature Effects on Water Quality Changes during Artificial Recharge.....	643
<i>J Greskowiak, H Prommer, G Massmann and G Nützmann</i>	
Transport Modeling of Tributyltin Coupled to Variable Salinity.....	651
<i>NO Kitterød, CE Amundsen, P Snilsberg, R Aasen and T Eggen</i>	
Experimental and Modeling Investigation of 2D DNAPLs Migration in the Subsurface.....	661
<i>A Luciano, M Petrangeli-Papini and P Viotti</i>	

A Multiple Dipole Flow and Reactive Tracer Test (MDFRTT): Initial Modeling Results.....	669
<i>M Mohamed, S Banwart and N Thomson</i>	
Mathematical Modelling of Transport and Transformation of Nitrogen from Pig Slurry Application in Cropped Soil. Influence of Soil Characteristics, Amount and Date of Pig Slurry Application and Crop Nitrogen Requirements.....	677
<i>M Montoya and M Martín</i>	
Modeling the Fate of Heavy Metals during Phytostabilization of Metal Polluted Soils with Trees.....	685
<i>B Nowack, R Schulín, MS Günthardt-Goerg, J Luster and B Robinson</i>	
Demonstration of Recent Problems Prognosing NAPL Source Zone Remediation Time.....	693
<i>D Schaefer</i>	
Long-Term Groundwater Quality Sampling Network Optimal Design with Measurements to Different Depths.....	701
<i>R Simuta and G Herrera</i>	
Reactive Transport Modelling of Flow and Nutrient Dynamics in a Coastal Aquifer (Waquoit Bay, MA, USA).....	709
<i>C Spiteri, CP Slomp, MA Charette, K Tuncay and C Meile</i>	
Spatial Uncertainty Analysis of Pesticide Leaching Using a Metamodel of PEARL.....	717
<i>A Tiktak, AMA Van der Linden, GBM Heuvelink and A Leijnse</i>	
Hydrobiogeochemical Modeling of Batch Experiments of the Mizunami Underground Research Laboratory in Japan.....	725
<i>N Todaka, J Molinero, Y Murakami and T Iwatsuki</i>	
A Backward Probabilistic Model to Calculate Well Head Protection Areas.....	731
<i>T Tosco, R Sethi and A Di Molfetta</i>	
Brine Infiltration in an Arid Environment Lacking of Hydrogeological Information.....	739
<i>E Usunoff, LN Guimarães and L Vives</i>	
Adaptation of the MT3DMS Model for Flexible Simulation of Kinetic Reaction Networks.....	745
<i>M Van Camp and K Walraevens</i>	
Assessment of the Ordinary Kriging and Neuro-Fuzzy Approaches in Interpolation of the Groundwater Level.....	753
<i>A Afrous, M Manshourí, SM Hosseini and Sh Goudarzi</i>
